

IELTS Writing Task 2 - Band 5 Sample Essay

Some people think that watching TV is bad for children, while others believe it can be educational. Discuss both views and give your own opinion.

Model Band 5 Answer:

Some people say that television is not good for children because it make them lazy and not do their homework. Other people think that TV is good because children can learn things from it. In my opinion, TV can be good or bad depending how it is use.

First of all, some programs on TV are not good for children. For example, violent movies and shows can make children more aggressive. Also, when children watch TV for long time, they don't go outside to play or study, so they become less active. This can cause health problems like obesity.

On the other hand, TV can help children learn about the world. There are many educational programs about science, history, and nature. For example, National Geographic or Discovery Channel teach many interesting facts. If parents control what their children watch, TV can be a useful tool for education.

In conclusion, I think television is not always bad, but parents should make sure children watch the right programs and not spend too much time in front of the screen.

Why Band 5?

- Task Response: Addresses both sides but with limited development.
- Coherence and Cohesion: Ideas are connected but lack strong linking phrases.
- Lexical Resource: Uses simple vocabulary; some repetition and minor errors.
- Grammar Range and Accuracy: Frequent grammatical mistakes but message is clear.
