

# IELTS Writing Task 2 - Band 6 Sample Essay

Some people think that technology has made our lives more complicated, while others believe it has made life easier. Discuss both views and give your own opinion.

## Model Band 6 Answer:

Nowadays, technology plays an important role in our daily lives. Some people believe that it has made our lives more difficult, while others argue that it has made everything easier. I personally believe that although technology can be confusing sometimes, it has mostly improved our lives.

On one hand, technology can be complicated because it changes very fast. Many people, especially older generations, find it hard to keep up with new devices and systems. For instance, learning how to use online banking or smartphones can be stressful for some people. Furthermore, people spend too much time on their phones or computers, which reduces face-to-face communication and can cause health issues like eye strain and stress.

On the other hand, technology makes life more convenient and efficient. It helps people save time and stay connected. For example, online shopping and video calls allow us to do things faster and communicate easily with friends and family around the world. Technology has also made education and work more flexible through online learning and remote jobs.

In conclusion, I think technology has made life easier overall, even though it can sometimes be difficult to understand. We should learn how to use it properly and balance our time to avoid the negative effects.

### Why Band 6?

- Task Response: Fully addresses the question but lacks depth in examples.
- Coherence and Cohesion: Clear structure with logical flow, but transitions could be smoother.
- Lexical Resource: Adequate range of vocabulary with minor repetition.
- Grammar Range and Accuracy: Mostly correct grammar with some complex sentence attempts.
